## OVERSIZING FRONIUS TAURO 50-3-D

### **Fronius International GmbH**

Hereby confirms that the inverter

#### **/ Fronius Tauro 50-3-D**

can be oversized 50% above the rated nameplate capacity without voiding the manufacturer's warranty, provided that

/ String configuration adheres to the voltage and current window guidelines published in the operation manual

/ The open circuit voltage of the PV generator does not exceed the maximum input voltage of the inverter under any circumstances (temperature, irradiance)

/ The maximum DC array short circuit current of the PV generator must not exceed the maximum module array short circuit current ( $I_{SC\ PV}$ ) of the inverter.  $I_{SC\ PV}$  according to IEC 60364-7-712, NEC 2020, AS/NZS 5033:2021 is defined as:  $I_{sc\ pv} = I_{sc\ max} \geq I_{sc} (STC) \times 1.25$   
For more detailed information, please see the technical datasheets.
